

## TEST YOUR PERCEPTION OF SOUND

Researcher: Harin Lee (supervised by Dr. Daniel Müllensiefen)

Please read the following information carefully before deciding whether or not you would like to participate.

The full battery of tests will take approximately an hour to complete.

### Description of the Test

This battery of timbral perception test is composed of 5 interactive sub-tests and 1 survey to assess your ability to hear fine differences in sound. The sub-tests are three timbral discrimination tasks, a pitch discrimination task, and a duration discrimination task. You will be instructed by the instructor on how to perform for each test prior to testing.

If you would like to know about how you performed, please leave a correct email address to the instructor and the results will be sent to you via email within two weeks.

Participation in this study is completely voluntary. All data collected in the study will remain confidential and anonymous. You may withdraw your data at any point. You are also free to withdraw from the study at any point and do not need to provide a reason for doing so. You must be 18 years or older to participate.

If you have any questions or concerns about the study, please contact student researcher Harin Lee at [mu301hl@gold.ac.uk](mailto:mu301hl@gold.ac.uk) or supervisors Dr. Daniel Müllensiefen at [d.mullensiefen@gold.ac.uk](mailto:d.mullensiefen@gold.ac.uk).

The study has been ethically approved by the Department of Psychology of Goldsmiths (University of London) ethics review procedure.

If you would like to participate in the test, please sign below to confirm that you are 18 years of age or older. Signing also confirms that you have read and understood the above information and that your participation is completely voluntary and that you are free to withdraw from the test at any point, for any reason, without affecting your legal rights.

I freely give my consent to participate in this research study.
